SUMMARY

Highly driven second year Computer Science student at the University of Birmingham. Achieved an outstanding 86% in first year exams, continuing a lifelong theme of top grade attainment. Keen to apply academic knowledge to real world challenges, with diverse work experience placements from British Airways to an IT professional services placement in Zagreb. A strong team player with determination and perseverance, as demonstrated by being voted 'player of the year' for multiple football awards (despite being technically the worst player on the pitch!). Currently seeking an engaging industrial placement to develop skills through hands-on experience and immersion with industry professionals.

WORK EXPERIENCE

University of Birmingham - *Student Ambassador* Oct 2024 - Present

Chosen to represent the School of Computer Science at open days, webinars, and Q&A sessions, engaging with 500+ prospective students to promote the University.

Guild of Students - *Technical Assistant* Jan 2025 - Present

Support Student Union events with up to 500+ attendees, setting up equipment and managing sound and lighting whilst resolving any technical issues.

Elegant Cuisine - *Waitress* Dec 2024 - Present

Deliver high quality customer service at large-scale events (100-400 people) at Oxford Town Hall and private catering assignments.

Box - *Student Insight Week* Sep 2025

Gained exposure to Marketing, Sales, and HR, providing insight into how teams collaborate to deliver solutions and maximise outcomes. Worked in teams of 2-4 on projects including designing a marketing campaign and delivering a sales pitch to Box employees.

Frankly Solutions - *3-week internship* Jun 2025

Contributed to the development of a Salesforce CPQ and Revenue Cloud tool for product lifecycle management and cross-environment deployment, implementing code for 20+ backend API calls and test classes in Apex.

PwC - *Insight Week* Jul 2023

Explored multiple business areas through webinars, presentations, and interactive activities. Delivered a sustainability based project, applying the newly learned industry information and skills.

Met Office - *Work Experience* Mar 2023

Shadowed professionals to gain an insight into Met Office operations. Attended 10+ presentations and meetings, while exploring advanced technology systems such as the supercomputer.

British Airways - *Work Experience Week* Feb 2023

Heathrow based engineering programme provided insights into various divisions through workshops, hands-on practical tasks, and a 6-person team research project, presenting findings through a group presentation.

Oxford Metrics - *Work Experience*

Feb 2023

Observed production, testing, and system design of the Oscar-winning motion sensor technology whilst exploring the company’s cutting-edge use of AI.

One London House - *Website Administration*

Apr 2021 - Sep 2021

Uploaded 200+ items of content to the international website and adapted copy for a UK audience, strengthening technical skills and customer-focused business awareness.

PROJECTS

2D Platform Game

Designed and implemented a 2D graphic police chase game using Python.

Text Based Mystery Game

Created an interactive text based murder mystery game in Java, with 10+ user commands.

Portfolio Website

Developed a responsive portfolio website, using HTML, CSS, and JavaScript.
